PT Sarana Multi Infrastruktur (Persero) rated "idAAA", outlook stable

PEFINDO has affirmed its "idAAA" ratings for PT Sarana Multi Infrastruktur (Persero) (SMI) and its outstanding bonds, and affirmed its "idAAA(sy)" rating for the Company's outstanding Shelf Registered Sukuk Mudharabah I/2018. At the same time, PEFINDO affirmed its "idAAA" rating to SMI's Shelf Registered Bonds II/2019 Phase I Series A amounting of IDR224.0 billion that will mature on July 5, 2020. As of December 31, 2019, SMI recorded IDR13.8 trillion in cash and cash equivalent as well as marketable securities to support the repayment of its maturing debt. The outlook for the corporate rating is "stable".

An obligor rated *idAAA* has the highest rating assigned by PEFINDO. Its capacity to meet its long-term financial commitments, relative to that of other Indonesian obligors, is superior.

The rating for the green bonds only reflects SMI's capacity to meet its long-term financial commitments on the debt security, and does not reflect the green certification of the debt security. In case the green certification is downgraded, which may trigger the acceleration of the principal payment and/or a step up on the coupon rate of the debt security, PEFINDO will conduct a special review of the rating assigned to SMI and its outstanding debt security.

The corporate rating reflects SMI's status as a critical government-related entity, the high potential demand for infrastructure financing, its very strong capitalization profile, and strong liquidity and financial flexibility indicators. The rating is constrained by its concentrated financing profile and limited number of viable infrastructure projects.

The rating could be lowered if there is a material reduction in support from the government, which may result from a significant deterioration in SMI's business and asset quality profiles.

PEFINDO views the COVID-19 outbreak will have a minimal impact in the infrastructure financing industry considering that infrastructure is critical to support economic activities in Indonesia. This is also has been supported by the direction of the government to put infrastructure as one of the top priority sectors.

We expect this outbreak to have a minimal impact on SMI's credit profile, considering its financing portfolio is mostly come from SOEs and municipalities that in our view have a better or lower risk. PEFINDO is of the view that these segments have a strong ability to maintain creditworthiness in the face of an economic downturn. In addition, we also consider SMI's strong underwriting policy and tight monitoring activities will reduce a potential significant shock in its business or financial profile. Furthermore, its financing portfolio is further supported by guarantee by the government which reduces the uncertainty of collection performance.

PEFINDO will continue to closely monitor these conditions to assess how the impact of COVID-19 is developing, and should there be material alterations we will conduct the necessary rating actions.

SMI is a state-owned entity established to serve as a catalyst in the acceleration of infrastructure development in Indonesia, by providing an alternative source of funds for project financing and promoting public-private partnerships (PPP). SMI is wholly owned by the government.
