PT Barata Indonesia affirmed at “idCCC” with “CreditWatch with Negative Implication”

PEFINDO has affirmed its “idCCC” rating of PT Barata Indonesia (Persero) (Barata) and its MTN I Year 2017 Series A due on December 7, 2020 and MTN I Year 2017 Series B maturing on March 16, 2021. We have maintained a “**CreditWatch with negative implication**” for the corporate rating as the Company is still in the process to restructure its MTN I Year 2017 Series A and MTN I Year 2017 Series B which will be proposed on *Rapat Umum Pemegang MTN (RUPMTN)* on December 8, 2020. Without the debt restructuring, Barata is highly exposed to the risk of non-payment for its maturing MTNs as it highly relies on external funds to serve its obligations. Its recent track record in failing to repay the matured MTN will put additional pressure in Barata’s financial flexibility.

An obligor rated *idCCC* is currently vulnerable, and is dependent upon favorable business and financial conditions to meet its financial commitments.

The rating reflects our view on Barata’s high liquidity risk, high financial leverage, and weak cash flow protection measures. The rating is offset by its good market position as a manufacturer of iron and steel castings in its main end markets, and our expectation for continued demand from infrastructure projects.

The rating could be lowered if Barata fails to obtain approval from its MTN holders to restructure its MTN and/or fails to secure external funds to serve its obligations. We may raise the rating and/or remove it from CreditWatch with negative implication if it has sufficient funding sources to repay or obtain approval to restructure its MTN from its MTN holders.

PT Barata Indonesia (Persero) is a state foundry and manufacture company, the shares of which were 100% owned by the Government as of June 30, 2020. It manufactures iron and steel castings and forged components for sale to industrial and energy companies. As a midstream player, its industrial castings are engineered and produced for applications to be used in a range of industry sectors, such as agro, oil and gas, rolling stock, hydro mechanical, industry process, as well as construction and material handling equipment. Barata also positions itself as an engineering, procurement, and construction (EPC) company, leveraging its long experience in foundry and manufacturing for greater job acquisitions, with focus on sugar and agro, oil and gas, generator, water resources, and component machinery.
